Gracie Abrams - Stay

```
Sib                                                  Rem
You told me something when I left but I don't remember
Dom                                                   Sib    Fa
Maybe 'cause all I could do then was stare at the floor
Sib                                                   Rem
I held myself 'cause you wouldn't, all wrapped in my sweatshirt
Dom                                                Sib    Fa
Wonder if you even noticed that that one was yours
    Mib                    Dom                   Solm      Reaug
And maybe I should've but I never told you "I'm sorry"
Mib                        Dom                    Fa
Know that I tried but my words always got in the way

Sib
Could you hold me without any talking?
Fa
We could try to go back where we started
  Solm
I don't even have to stay
  Mib
I don't even have to stay but
Sib
If I woke up with you in the morning
Fa
I'd forget all the ways that we're broken
Solm
I don't care if you've changed
  Mib                      Sib
I don't even have to stay

Sib                                                    Rem
I don't remember the last time I heard from your sister
Dom                                                 Sib    Fa
Didn't expect to but I sorta thought that I would
Sib                                                    Rem
Wish I could tell you by now that I felt more indifferent
Dom                                                 Sib     Fa
Catch myself thinking about you more than I should
    Mib                    Dom                   Solm       Reaug
And maybe I should've but I never told you I miss you
Mib                   Dom                          Fa
I almost said it but don't know if you feel the same

Sib
Could you hold me without any talking?
Fa
We could try to go back where we started
  Solm
I don't even have to stay
  Mib
I don't even have to stay but
Sib
If I woke up with you in the morning
Fa
I'd forget all the ways that we're broken
Solm
I don't care if you've changed
  Mib                      Sib
I don't even have to stay
```
