Go easy - Dua Lipa (GTAuto VI - The Album)

```
Sim                        Fa#m
  I try to speak, but I'm frozen
            Sol
Suffocated emotion
                     La             Sim
I'll be damned if I say it out loud
                        Fa#m
It's closing in by the minute
                      Sol
And we don't wanna admit it
                     La                Sim
Can't get high on a love we burned out

          Fa#m               Sol
Oh, we're far from where we started
      La              Sim
I can see it in your eyes
         Fa#m                   Sol
All your pain, I wish I could take it all
                  La                  Sol
Take it, take it all away, my love (Oh)

   La              Sim
Go easy while you can
     Fa#m
It's only getting harder
Sol  La                Sim
 I hope you'll understand
         Fa#m
We ain't getting any stronger
Sol                  La
I can't hold you back any longer
Sim                  Fa#m
You've been holding on for so long
Sol                  La             Sim  Fa#m
Save yourself, and baby, go easy now

        Sol   La
go easy now

Sim                        Fa#m
  I held my breath, ran a red light
                      Sol
Heading home with no headlights
                        La
Tempting fate, walking on a wire
Sim                       Fa#m
  I wish that I could control it
                      Sol
And act like I didn't know it
                       La
Runnin' in circles like we ain't tired

Sim          Fa#m               Sol
  Oh, we're far from where we started
      La              Sim
I can see it in your eyes
         Fa#m                   Sol
All your pain, I wish I could take it all
                  La                  Sol
Take it, take it all away, my love (Oh)
