Calleth you cometh I - The Ark

```
Do     Sol     Lam     Sol 2v

Do                   Sol
And I know we were both too young
     Lam                   Sol
way back when we had our thing
Do                  Sol
And you're not the one that I think of
      Lam                      Sol
everytime that the telephone rings
Do                 Sol
And I know that what we had
                Lam                          Sol
would not be called love by the ones we know
Do                     Sol
And I know it's been many years
       Lam                   Sol
and a hundred love-affairs ago

Mim          Do
I know all that so well
       Re            Do
but I also do know this
Lam            Re
Calleth you, cometh I
Do                       Sol
And that's just how it is
                        Lam
and how it's always been
                         Sol
It's where my reason stops
                           Do
and something else comes in
                         Sol
I know it doesn't make sense, but still
Lam            Re
Calleth you, cometh I
               Do     Sol     Lam     Sol
That's how it is...

Do                Sol
And I know we became restrained
      Lam                  Sol
everytime we were among friends
Do                   Sol
And I know how it was last time
         Lam                 Sol
and how bitterly it always ends
Do                    Sol
And I know we were both too young
               Lam                  Sol
to know what real love would be like
Do                       Sol
And I know that our communication
       Lam                Sol
didn't always work out right

Mim          Do
I know all that so well
       Re            Do
but I also do know this
Lam            Re
Calleth you, cometh I
