Asaf Avidan - Sweet Babylon

```
Dom            Dom
Take my body, pull it down
Dom           Dom
Be the words upon my tongue
La#                          La#
Oh sweetest queen of harlots

                    Dom
Let me taste your praise

Dom                   Dom
Let me drown in you, let me feast
Dom                 Dom
Let me ride your seven headed beast
La#                         La#                      Dom
Let me strip before you, and step back in your gaze

        Mib             La#
And I know there's a night
      Dom             Mib
At the edge of this light
La#
I'm coming home
 Lab
Sweet Babylon
            Dom
I'm coming home

Dom
Abomination of hearts and sea
Dom
Rain your terror down on me
La#                                                                  Dom
Untamethe blueness in these eyes, I'll be the shadow by your side

Dom
Oh goddess of unholy things
 Dom
Bring me all your beauty brings
 La#                                                        Dom
Show this wretched, weak apostate where his gods reside

 Mib                  La#
And I know there's a night
Dom                  Mib
At the edge of this light
  La#
I'm coming home
  Lab
Sweet Babylon
  Dom
I'm coming home

 Dom
I bet your hills remember, your towers ring
 Dom
All the tunes I used to sing
  La#
Let me try them on my lips again
 La#                         Dom
You know I never miss a note

Dom
Oh dirty mother of whore and thief
```

By TestoeAccordi.it

```
Dom
I went away but time is brief
La#
Let me spend all that is left with you
La#                 Dom
Until I have to float

 Mib                  La#
And I know there's a night
 Dom                  Mib
At the edge of this light
 La#
I'm coming home
 Lab
Sweet Babylon
 Dom
I'm coming home

Mib                   La#
And I know there's a night
Dom                  Mib
At the edge of this light
 La#
I'm coming home
 Lab
Sweet Babylon
 Dom
I'm coming home

La#
I'm coming home
Lab
Sweet Babylon
Dom
I'm coming home

La#
I'm coming home
 Lab               Dom
Sweet Babylon
I'm coming home
```
