Shine – Take That

```
Mib                              Sol
You, you're such a big star to me
                              Sibm
You're everything I wanna be
                        Lab                            Mib
But you're stuck in a hole and I want you to get out
                                 Sol
I don't know what there is to see
                                    Sibm
But I know it's time for you to leave
                           Lab
We're all just pushing along
                      Sol7
Trying to figure it out, out, out
Dom             Sib               Lab
All your anticipation pulls you down
     Lab/Sol          Fa   Mib              Sib
When you can have it all, you can have it all

         Mib       Sol       Dom
So come on, come on, get it on
            Sib                   Lab
Don't know what you're waiting for
              Mib/Sol          Fa7       Sib
Your time is coming don't be late, hey hey
         Mib
So come on
         Sol            Dom
See the light on your face
        Sib
Let it shine
             Solb6      Lab
Just let it shiiiiiiiiiiiiiiine
       Mib
Let it shine

Mib                          Solm
Stop being so hard on yourself
                          Sibm
It's not good for your health
                      Lab
I know that you can change
   Labm                        Mib
So clear your head ang come round
                             Solm
You only have to open your eyes
                              Sibm
You might just get a big surprise
                 Lab
And it may feel good
    Labm                Sol7
and you might want to smile, smile, smile
Dom                  Sib             Lab
Don't you let your demons pull you down
       Mib/Sol          Fa   Mib              Sib
'Cause you can have it all, you can have it all

         Mib       Sol       Dom
So come on, come on, get it on
            Sib                   Lab
Don't know what you're waiting for
              Mib/Sol          Fa7       Sib
Your time is coming don't be late, hey hey
         Mib
So come on
