The flood - Take That

```
Re
Standing
                  Sol
On the edge of forever
                    Sim
At the start of whatever
                      Fa#m
Shouting love at the world
Re
Back then
             Sol
We were like cavemen
                   Sim
But we mapped the moon and the stars
           Fa#m
Then we forgave them
Mim              Sol
 We will meet you  where the lights are
Sim           Fa#m
 The defenders  of the faith we are
Mim
When the thunder turns around
        Sol                                    Sim
They'll run so hard we'll tear the ground away
          Do#m7 Si/Re#
You know no one   dies
          Mim          Si/Fa#
In these love-drowned eyes
             Sol6         Si
Through our love-drowned eyes
              Fa#7/4       Fa#
We'll watch you sleep tonight

Sol                   Re
Although no one understood,
                          Sim
we were holding back the flood
                         Fa#m
Learning how to dance the rain
Sol                       Re
We were holding back the flood
                             La
They said we'd never dance again

Re
Bleeding
               Sol
But none of us leaving
             Sim
Watch your mouth, son
                          Fa#m
Or you'll find yourself floating home
Mim              Sol
 Here we come now  on a dark star
Sim           Fa#m
 Seeing demons,  not what we are
Mim
Tiny minds and eager hands
     Sol                                Sim
Will try to strike but now will end today
         Do#m7 Si/Re#
There's progress now
             Mim      Si/Fa#
Where there once was none
```

```
            Sol6      Si
Where there once was, ah
                Fa#7/4  Fa#7
Then everything came along

Sol                  Re
Although no one understood,
                          Sim
we were holding back the flood
                        Fa#m
Learning how to dance the rain
Sol                      Re
We were holding back the flood
                            La
They said we'd never dance again
Sol                  Re
Although no one understood
                             Sim
there was more of them than us
                           Fa#m
Learning how to dance the rain
Sol                         Re
We were holding back the flood
                            La
They said we'd never dance again

Mim              Sol
 We will meet you  where the lights are
Sim           Fa#m
 The defenders of the faith we are
Mim
When the thunder turns around
        Sol                                  Sim  Re6
They'll run so hard we'll tear the ground away

Sol  Re  Sim  Fa#m7  Sol  Re  La

Sol                  Re
Although no one understood
                             Sim
there was more of them than us
                          Fa#m
Learning how to dance the rain
Sol                           Re
There was more of them than us
                           La
Now they'll never dance again
                       Sol  Re  Sim  Fa#m
Now we'll never dance again

Sol  Re  La
```
