# *Dead inside - Muse*

```
Dom
  Dead inside!

Dom                 Mib
 Revere a million prayers
    Sib               Dom
And draw me into your holiness
                       Mib
But there's nothing there
             Sib                    Dom
Light only shines from those who share
                     Mib
Unleash a million drones
    Sib          Dom
Confine me then erase me babe
                 Mib
Do you have no soul?
               Sib        Lab7+
It's like it died long ago
     Sol               Dom
Your lips feel warm to the touch
        Sib               Lab7+
You can bring me back to life
        Sol             Fam            Lab
On the outside you're ablaze and alive
           Sib         Dom     Mib  Sib
But you're dead inside!

Dom     Mib  Sib

Dom                          Mib
 You're free to touch the sky
       Sib               Dom
Whilst I am crushed and pulverized
                       Mib
Because you need control
             Sib                Dom
Now I'm the one who's letting go
                      Mib
You like to give an inch
       Sib              Dom
Whilst I am giving infinity
                           Mib
But now I've got nothing left
             Sib            Lab7+
You have no cares and I'm bereft
     Sol               Dom
Your skin feels warm to caress
      Sib            Lab7+
I see magic in your eyes
       Sol             Fam             Lab
On the outside you're ablaze and alive
                       Dom
But you're dead inside!

Dom    Lab    Mib    Sib4 Sib

Dom    Lab    Mib    Sib4 Sib

Dom           Lab
Feel me now, hold me please
  Mib                   Sib4 Sib
I need you to see who I am
     Dom            Lab
Open up to me, stop hiding from me
```

```
     Mib
It's hurting babe
     Sib                 Dom
Only you can stop the pain
      Lab          Mib
Don't leave me out in the cold
      Sib             Dom
Don't leave me out to die
           Lab
I gave you everything
                 Mib
I can't give you anymore
           Sib            Lab
Now I've become just like you
   Sol              Dom
My lips feel warm to the touch
   Sib              Lab
My words seem so alive
   Sol             Dom
My skin is warm to caress
        Sib             Lab
I'll control and hypnotise
                     Sol           Dom
You've taught me to lie without a trace
       Sol             Lab
And to kill with no remorse
       Sol              Fam         Lab7+
On the outside I'm the greatest guy
                     Dom
Now I'm dead inside!
